

PNEUMATIC AND HYDRAULIC ROTARY ACTUATORS

The details make up a perfect actuator...

THE NEXT STEP
in actuator technology at airpower!

BENEFIT FROM OUR KNOW-HOW!

OUR GLOBAL SALES MARKET IS THE ENTIRE EUROPEAN REGION, SCANDINAVIA, THE NEAR AND MIDDLE EAST, AFRICA, ASIA AND SOUTH AMERICA.
THE PROFESSIONAL PROXIMITY TO YOU IS VERY IMPORTANT TO US.

Airpower in Dattenberg near Linz on the Rhine, located between Bonn and Koblenz, is your independent partner for pneumatic and electric quarter-turn actuators and of industrial valves for the process industry and plant engineering.

At the company headquarters, 5000 sqm were invested in 2019 in a new building complex with generous administration, storage and production areas.

As an independent company, we offer you comprehensive and professional technical advice and support in engineering and customer service. Our technical support is geared to the specific project-related requirements, with the objective of offering the best possible cost-benefit ratio. We attach great importance to personal contact. We are committed to you! An experienced team ensures your absolute satisfaction. Sophisticated product technology, designed and produced in accordance with international standards and norms, guarantees absolute safety.

We have international approvals according to DIN EN ISO9001-2015, ATEX, SIL3, UKCA etc.

Our employees, whether in sales, design, purchasing, production, assembly or warehousing, ensure a smooth and fast order throughput of every order.

We deliver far more than 10.000 pieces pneumatic actuators from 4-13.000 Nm from stock. Manually operated and fully automated industrial valves from nominal diameter DN10 - DN1400 complete our delivery program.

We also realize special designs with our design department according to your wishes. Thus, in addition to our standard actuators with 90° swivel angle, we supply actuators with 120°, 135°, 180° swivel angle, 3-position actuators (metering actuators), Scotch Yoke actuators and much more.

TECHNICAL DATA

CERTIFICATES

SIL3, CE, ATEX, UKCA

AIRPOWER SCOTCH YOKE SCHWENKANTRIEBE APY-S UND APY-A SERIE

With the new APY quarter turn actuator, we offer you a new actuator concept that is designed and produced in accordance with international standards and norms.

Benefit from our more than 35 years of experience in the areas of rotary actuators and automation.

APY DRIVE

The APY series is an extension of our product range for larger torque requirements for the automation of 90 ° valves. High reliability through the selection of high-quality materials in connection with a high level of corrosion protection guarantee use even under adverse conditions.

MAIN FEATURES

The APY actuator series is designed according to a modular system. The actuator essentially consists of a central part, a cylinder, and a spring module for the single-acting actuator. With the double-acting actuator, it is possible to equip the middle part with one or two cylinders. All connections according to ISO 5211 standard

TECHNICAL SPECIFICATIONS

The working medium is usually dry compressed air, inert gas or hydraulic oil.

Max. Pneumatic control pressure: 10bar, medium oil, please inquire

Temperature ranges, standard: -35 ° C to + 80 ° C

High temperature: -20°C to +150°C

Low temperature: -55°C to +80°C

Double acting torques:
up to 240,000Nm

Single acting torques:
up to 146,000Nm

Surface quality: Paint blue RAL 5015,
coating thickness 75 – 100µm

DRIVE ASSEMBLY

ROTATION ANGLE ADJUSTMENT

SWING SHAPES

Asymmetric swing arm APY-A
for butterfly valves

Symmetrical swing arm APY-S
for ball valves and shut-off valves

NAMUR INTERFACES

Interface NAMUR
VDI / VDE 3845 and 3847

Interface according to
ISO 5211

Nr.	Name	Pcs.	Material
1	Flange Cap	1	Steel
2	Spring guide	1	Steel
3	Spring	1	Steel
4	Spring body	1	Steel
5	Spring rod	1	Alloyed Steel
6	Visual display	1	Steel

EXAMPLES ACTUATOR SELECTION

When selecting actuators, we can choose more economical actuators if we know the breakaway torque (BTO) and the running torque (RTO) of the valve in question. The following are examples of actuator selection for ball valves and butterfly valves. Actuators for ball valves should be selected with a symmetrical swing arm (S) and butterfly valves with an asymmetrical swing arm (A).

SWING SHAPES

Asymmetric swing arm (A)
for butterfly valves

Symetrical rocker (S).
For ball valves

CHARACTERISTICS

■ Spring return operating curve ■ Air to spring operating curve

■ Ball valve (butterfly valve) operating curve
